Objective

Motivated and detail-oriented Junior Full Stack Developer with hands-on experience in building scalable web applications and APIs. Eager to grow in a fast-paced, agile environment by contributing to functional testing, test automation, and full-stack development. Passionate about participating in real-world SDLC processes, agile project management, and DevOps practices while working alongside experienced software professionals. Committed to continuous learning, problem-solving, and delivering production-ready software solutions.

Experience

ICEP | Junior Full Stack Developer 2024-2025

- Built a log management system with SLA tracking and status updates (PENDING, IN PROGRESS, ONHOLD, RESOLVED), improving issue resolution rate by over **30%**.
- Collaborated in an Agile team on full-stack features, sprint planning, and code reviews.Improved product recommendations and increased sales
- Built technician collaboration tools, live chat, and feedback modules for real-time communication and service tracking.
- Integrated QR code scanning to streamline form entry and location-based issue reporting.
- Created secure RESTful APIs with proper validation and error handling.
- Participated in system testing, debugging, and production deployment readiness
- Managed front-end routing and state with React Hooks and React Router.

Education

Tshwane University of Technology | Diploma in Computer Science 2021-2024

Major: Computer Science

Indonsa Technical High School | Matric 2020

Major: Science
